Quality Safety

Quality Energy Services's Safety Incentive Program encourages personnel to take initiative in improving safety measures in the work environment.

Quality Energy Services is committed to conducting business in a manner that protects the safety and health of all personnel involved in its operations, to respect and care for the environment and to preserve the physical resources of the company.

To accomplish this, Quality Energy Services will focus on promoting a culture encouraging the development, implementation and continuous improvement of operating systems which protect personnel and the environment, and preserve company assets. Establish principles and policies regarding safety, health, and environmental protection, and focus on continuously improving safety, health, and environmental performance.

Communicate about safety, health, and environmental responsibilities to every individual within the organization and hold personnel accountable. Quality Energy Services will identify, evaluate, and control safety, health, and environmental hazards through risk analysis.

Monitor and audit ongoing operations to assure conformance to safety, health, and environmental objectives. Confirm that safety, health, and environmental standards and policies are achieving the objectives. Identify non-compliance with safety, health, and environmental requirements, promote culture where all incidents and near misses are reported and investigated, take corrective action and verify the effectiveness of those actions.

To maintain health, safety, and environmental standards, each employee involved in operation is required to have specific training.

FLOWBACK DIVISION

Since 2001, Quality Energy Services has been an industry leader in providing total-solution services to energy majors in the Gulf of Mexico and to future ventures in the world market. With our experienced team and multiple locations, we provide wellbore, production, intervention, workover and P&A services to the offshore sector and wellhead services to the onshore sector located in the Gulf Coast states.

Our experienced and knowledgeable team works diligently to ensure that Quality Energy Services maintains its leading position in the energy industry, specifically in deep-water, shelf, inland and land location projects. Quality Energy Services promotes a culture of experts, with a skill-set for high profile, high pressure wells. Our assets include a full fleet of vessels, Wireline offshore and land equipment to assist our clients with a variety of operations.

We pride ourselves in giving each project prompt and personal service from start to finish, ensuring complete success, because your well productivity is our priority.
