Project Management

- * QES offers drilling and production solutions in packages to bring increased benefits and added value to your operations. By utilizing bundled services, you experience the same level of quality but with added cost advantages.
- * Cost are lower because our service teams are cross-trained, limiting the number of workers employed. In addition, less downtime occurs because of greater control over scheduling, leading to faster project completion and consistent quality.

Project Management Packages

- * Total Service/Equipment Package-
Provide crews and equipment for land and marine installations.
- * Personnel Service/Service Package-
Provide personnel to operate your wireline equipment.
- * Wellhead and Downhole Service-
Provide complete rental packages of Wellhead and Downhole equipment.
